AI-POWERED QUESTION PAPER

Subject: Python
Topic: matplotlib,numpy,arrays
Difficulty: Easy
Bloom's Level: Understand
Date: 29-10-2026

Q1. Explain how functions improve the structure of a Python program.

Q2. Which of the following is an immutable Python data type?

A) List	B) Dictionary
C) Tuple	D) Set

Q3. What is Python?

Q4. Evaluate the advantages of using Python for rapid application development.

Q5. Which loop is commonly used to iterate over a sequence?

A) switch	B) for
C) goto	D) case

Q6. Design a Python application for managing student marks and generating grades.

Q7. Which method adds an element to the end of a Python list?

A) add()	B) insertEnd()
C) append()	D) push()

Q8. What is a variable in Python?

Q9. Write a Python statement that checks whether a number is even.

ANSWER KEY

Q1: Functions divide a program into reusable logical units, improving readability, testing, maintenance and code reuse.

Q2: C

Q3: Python is a high-level, interpreted programming language.

Q4: Python provides readable syntax, extensive libraries, rapid prototyping and a large ecosystem, although execution can be slower than some compiled languages.

Q5: B

Q6: The application should collect marks, validate input, calculate totals and percentages, assign grades, store records and display a report.

Q7: C

Q8: A variable is a name used to store a value in a program.

Q9: Use: if number % 2 == 0:
